Capacity: 60 LBS per Bin

VIS-I-RACK™ HIGH CAPACITY BLUEPRINT STORAGE RACKS

Take advantage of your vertical wall space to organize your blueprints or other large rolled materials. This rack requires only a very compact footprint saving you valuable floorspace. Heavy duty steel frame with welded posts supports up to 960 lbs of material per rack. Model VR864 includes five 8" bins in the lower section for extra large rolls, four 6" bins in the middle section for medium to semi-large rolls, and four 4" bins in the upper section for smaller rolls. Model VR165 includes sixteen 5" bins. Overall units are 84" tall, 21" wide and 11" deep and rest on steel "feet". Bin "posts" are welded at an incline and extend 9" off the frame. Wall brackets with 16" stud spaced mounting holes extend the frame 1-1/4" off the wall to allow space for chair rail or baseboard are included. Finished in a durable powder coated textured black paint.
